

**DEVICE FOR WRAPPING A BALE WITH A WRAPPING SHEET AND INCLUDING
A CONTROL UNIT RESPONSIVE TO WRAPPING CONDITION SENSOR(S)**

Abstract of the Disclosure

The invention suggests a device for wrapping a bale with a wrapping sheet , which comprises one or more sensors that detect whether the bale is wrapped properly with the wrapping sheet. A baling press is equipped with such a wrapping device as well as a control or regulating unit (ECU) that receives a signal from the one or more of the sensors and acts to interrupt the wrapping of a bale in the event the signal indicates an improper wrapping process is underway.
